Tasks

MERN Stack :

Make a responsive ui web app for following tasks using reactjs and rest apis using nodejs

1. signup(as mentor and employee)
2. Login (for both users mentor and employee)
3. Add Tehcnologies
 - a. Name
 - b. Image
 - c. Resources link array(for this we need to implement text box with + icon. By clicking on + icon one more text field will be added and so on. There should be atleast one field)
 - d. status
4. Add projects (by mentor)
 - a. Add requirements with timeline
 - b. Start date
 - c. End date
 - d. Add other documents
 - e. Add members
 - i. Email has to be send with all project requirements, timeline and other details
 - f. Remove members
 - g. Technology stack(multi select dropdown)
5. List projects after login
 - a. Mentor can see projects added by them only
 - b. Employees can see projects in which they are added as members
6. Project dashboard(this is for individual projects)
 - a. Create task list table
 - b. Add column for following details
 - i. Estimated duration
 - ii. Final time
 - iii. Status for completed(checkbox)
 - iv. Comment
 - v. Reply
 - vi. QA
 - vii. Code quality

- viii. Approved by client
- ix. Developer name
- x. date

Manager Module:

Note: we will mainly focus on code quality and code optimization
